National Park Service

Notice of Availability of the Final Development Concept Plan/Amendment to the General Management Plan and Final Environmental Impact Statement for Crater Lake National Park, Oregon

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (Public Law 91-190, as amended), the National Park Service, Department of the Interior, has prepared a Final Development Concept Plan/Amendment to the General Management Plan/Environmental Impact Statement (DCP/FEIS) that describes and analyzes a proposal and three alternatives that meet immediate and long-term needs at Crater Lake National Park regarding employee housing, completion of the ongoing redevelopment at Rim Village, and maintenance, administration, and storage facilities.

The Draft Development Concept Plan/Amendment to the General Management Plan/Environmental Impact Statement (DCP/DEIS) was released for public review on November 29, 1994 (59 FR 228), and the public comment period closed February 2, 1995. During this comment period, three public meetings were held and written comments were also received. The DCP/FEIS contains responses to the comments received and modifications to the document as needed in response to the comments.

The proposal, which was developed in response to public and agency comments on the DCP/DEIS, calls for removing the visitor parking at Rim Village and constructing a new parking structure 800 feet off the rim with a shuttle bus system to provide year-round access to the rim; creating a new roadway on which visitors would travel from the parking facility to Crater Lake Lodge in shuttle buses; partially restoring to natural conditions a one-acre maintenance yard near park headquarters with the remainder of the site converted to an employee recreation area; developing a 98-person employee dormitory and associated parking, roads, pedestrian path, seasonal employee recreational vehicle (RV) sites, a maintenance building and group campsites at Mazama Village. New opportunities for placement of facilities

originally proposed at the South Entrance were identified through the public review for the DCP/DEIS. Consequently, a separate planning effort would be undertaken to determine the most appropriate location for construction of these facilities, including employee housing (approximately 20-30 houses, 15-20 RV sites, and a second 98-person dormitory to replace the Rim Village dormitory), and additional support and storage facilities.

Three alternatives were considered, in addition to the proposal. The no-action alternative would implement the 1988 DCP and include development of two day-use parking areas to service Rim Village with associated connecting trail and new road connecting facilities on the rim, and a new employee dorm for 60-65 people. The South Entrance focus alternative would construct a new employee dormitory at Mazama Village and would relocate park headquarters, additional employee housing, and support/storage facilities to the South Entrance. The Mazama focus alternative would concentrate most development at Mazama Village, including a new employee dormitory and support/storage facilities, with additional employee housing at the South Entrance.

Major impact topics assessed for the proposed action and the alternatives include earth resources, surface water, groundwater/water supply, water quality, air quality, vegetation, wildlife, special-status animal species, ecosystem processes, cultural resources, visitor experience, employee commuting and delivery of services, and land use and zoning.

SUPPLEMENTARY INFORMATION: The no-action period on this final plan and environmental impact statement will end 30 days after the Environmental Protection Agency has published a notice of availability of the DCP/FEIS in the **Federal Register**. For further information, contact: Superintendent, Crater Lake National Park, Post Office Box 7, Crater Lake, OR 97604-0007; telephone (503) 594-2211.
